The HI-TECH system is a system of information boards and plaques.

With this system, we can build a single-column, two-column, or three-column information board.

The content can be permanently printed or removable.

Main panel 700 x 120 mm with logo and name

This panel is used when building a single-column board.

Tenant information boards on steel cables.

The board is constructed of 5 mm thick acrylic glass panels.

The graphics are digitally printed on the back of the panel and adhered to the entire surface with a frosted foil imitating the glass's grain.

The mounting brackets are made of anodized aluminum, and the entire board is suspended on steel cables.

Board standard:

Top panel for logo, name, etc. 700 x 120 mm

Bottom panels for tenants: 700 x 80 mm

Each panel has system brackets attached to the sides.

Top brackets x 2

Bottom brackets x 2

Bottom brackets are adjustable: the board can be hung from the façade or ceiling/floor.

The box price is for one 700 x 120 mm panel with graphics and side brackets for securing cables.

In subsequent boxes, you can purchase 700 x 80 mm panels for tenants and a bracket system with cables.

Please send us the project details via email. After purchasing the product, we will send you the graphic design for approval.
